Spoštovani partnerji,

Podjetje Rujz design je na trgu prisotno od leta 1991, s proizvodnjo in prodajo pohištvenih ročajev in dekorativnega okovja pa se ukvarjamo skupaj že skoraj petindvajset let.

Dnevno proizvedemo cca 20.000 ročajev oziroma sestavnih delov dekorativnega okovja. Smo eno redkih podjetij v Evropi, ki ima znotraj svojega podjetja pokrite vse bistvene procese: oblikovanje, razvoj, proizvodnjo (mehansko obdelavo, tlačno litje, lakiranje, galvanizacijo) in prodajo izdelkov.

Smo oziroma želimo biti prepoznavno razvojno podjetje, ki svojim partnerjem nudi dobro oblikovane, uporabne, kvalitetne in inovativne izdelke. Razvoj poteka tako znotraj podjetja kot tudi skupaj z zunanjimi oblikovalci ali oblikovalci iz pohištvene industrije.

Proizvodni program obsega izdelke iz najrazličnejših materialov in obdelav, to je iz lesa, kovin, plastike, usnja in v nekaterih primerih tudi iz carbona. Kombinacije teh materialov pa izdelkom dajejo še posebno draž in privlačnost.

Seveda pa samo razvoj ni dovolj. Potrebna je tudi dobra organiziranost ter usklajenost proizvodnje in logistike, da lahko pripravimo izdelke, s katerim boste zadovoljni, tako s kvaliteto kot tudi z dobavnimi roki.

Za programom, ki ga v tem katalogu predstavljamo, stoji team strokovnjakov, sodelavcev in kooperantov, ki imamo skupni cilj – zadovoljiti vas, naše partnerje.

V kolikor bomo to dosegli, bomo zelo zadovoljni tudi mi.

Rujz design team

Dear partners,

The company Rujz design has been present on the market since 1991 and we have been manufacturing and selling furniture handles and decorative fittings for almost twenty-five years.

Every day, we make approximately 20,000 handles or components for decorative fittings. We are one of the few companies in Europe that covers all the main processes within the company: design, development, manufacturing (mechanical processing, pressure die casting, lacquering and galvanisation) and sale of products.

We are, and wish to remain, a recognised manufacturing company that offers its partners well designed, useful, and innovative products of a high quality. The development process takes place both within the company and together with outsourced designers, as well as with designers from the furnishing industry.

Our production programme encompasses products made with diverse materials and processing methods, i.e. from wood, metal, plastics, leather and, in some cases, even carbon. A combination of these materials gives the products a special charm and attraction.

However, development in itself is not enough. Good organisation and harmonisation of production and logistics are required in order to be able to prepare products that will please you both in terms of their quality and delivery times.

The programme, which is presented in this catalogue, is the result of teamwork from experts, employees and subcontractors with a common goal – to please you, our partners.

If we achieve that, we ourselves will also be very satisfied.

Rujz design team

Prodajni sistemi | Sales systems | Verkaufssysteme | Prodajni sustavi | Prodejní systémy | Система продаж

Prodajni modul je namenjen predstavitvi in posluževanju v samopostrežnih prodajnih mestih. Sestavljamo ga lahko poljubno v eno, dva, tri in celo večdelne module, po želji in glede na potrebe posameznega prodajnega mesta.

The sales module is intended for the presentation and usage in self-service stores. It can be arranged into one- , two-, three-, or even multi-part modules, according to the wishes and needs of a particular store

Der Verkaufsmodul ist für die Vorstellung und Bedienung in den Selbstbedienungs-verkaufsstellen geeignet. Er kann beliebig in ein-, zwei-, drei- oder sogar mehrteilige Module wunschgemäß und in Hinsicht auf Bedürfnisse individueller Verkaufsstelle zusammenge-setzt werden.

Prodajni modul namijenjen je predstavljanju i posluživanju u samoposlužnim prodajnim mjestima. Možete ga proizvoljno sas-taviti u module od jednog ili dva dijela ili čak više dijelova, prema želji i s obzirom na potrebe pojedinačnog prodajnog mjesta.

Prodejní modul je určen pro představování a použití v samoobslužných prodejních místech. Může se sestavovat libovolně do jedno-, dvou-, tří nebo i vícedílných modulů, podle přání a potřeb jednotlivého prodejního místa.

Модуль для продаж предназначен для представления и обслуживания в магазинах самообслуживания. Он может состоять из 1, 2, 3 составных модулей согласно пожеланиям и потребностям специфики магазина.

Prodajni sistem 3D je ena od možnosti obsežnejše prezentacije programa kot celote. Sestavljen je iz osnovnega prodajnega modula. Namenjen je večjim prodajnim mestom s kombiniranim, klasičnim ali samopostrežnim načinom prodaje.

The 3D sales system is one of the possibilities of presenting the programme as a whole on a larger scale. Consisting of a basic sales module, the programme is intended for larger sales outlets that utilise the combined, classic or self-service sales methods.

Das 3D Verkaufssystem ist eine von den Möglichkeiten der umfangreichen Präsentation des Programms als Ganzheit. Es besteht aus dem Hauptverkaufsmodul. Das System ist für größere Verkaufsstellen mit kombinierter, klassischer Verkaufsart oder mit Selbstbedienung bestimmt.

Prodajni sistem 3D je jedna od mogućnosti obimnije prezentacije programa kao celine. Sastavljen je od osnovnog prodajnog modula. Namenjen je većim prodajnim mestima sa kombinovanim, klasičnim ili samoposlužnim načinom prodaje.

Prodejní systém 3D je jednou z možností rozsáhlejší prezentace programu jako celku. Skládá se ze základního prodejního modulu. Je určen větším prodejním místům s kombinovaným, klasickým nebo samoobslužným způsobem prodeje.

Система продаж 3D является одним из способов более обширной презентации программы, как единого целого. Система состоит из основного модуля продаж. Предназначена для более крупных мест продаж с комбинированным, классическим или самообслуживающим видом продаж.

Razstavni pano je namenjen in primeren za predstavitev omejenega dela programa. Običajno ga uporabljamo za sejemske in druge predstavitve, primeren pa je tudi za predstavitev v manjših prodajnih mestih. Enostaven je za predstavitev, zamenjavo artiklov in zavzame malo prostora.

The exhibition board is intended to and appropriate for the presenta-tion of a limited part of the collection. We occasionally use it for presentations at fairs and elsewhere; it is also appropriate for presentations in small stores. It is practical for presentation, product rearrangement, and it does not occupy much space.

Die Ausstellungstafel ist für die Vorstellung erwähnten Teils des Programms bestimmt und geeignet. Sie wird gewöhnlich für Messe- und andere Vorstellungen gebraucht, sie ist aber auch für eine Vorstellung in kleineren Verkaufsstellen geeignet. Sie ist einfach für die Vorstellung, den Artikelaustausch und sie nimmt nicht viel Platz ein.

Izložbeni pano namijenjen je i primjeran za predstavljanje ograničenog dijela programa. Obično ga upotrebljavamo na sajmenim i drugim promocijama, a primjeran je i za predstavljanje u manjim prodajnim mjestima. Jednostavan je za predstavljanje i zamjenu artikala te zauzima malo mjesta.

Výstavní tabule je určená a vhodná pro prezentaci omezené části programu. Obyčejně ji používáme na veletrzích a jiných prezentacích, dále je také vhodná pro ukázku v menších prodejních prostorách. Je jednoduchá pro představování, obměnu artiklů a zaujímá jen málo místa v prostoru.

Выставочная доска используется для представления описания программы и употребляется обычно на выставках, а также на других представлениях , однако, более она подходит для выставления в небольших магазинах. Она проста для использования, замены статей и занимает мало места.

Alu profili. Sodobno obdelane aluminijaste litine za prihodnost obetajo drzne oblikovalske trende in so prava rešitev za vzdržljiva pohištvena okovja in dodatke. Aluminij je lahek in prestižen vendar izjemno trden.

Alu Profile. Modern verarbeitete Aluminiumgüsse versprechen mutige, wegweisende Gestaltungstrends und sind die richtige Lösung für widerstandsfähige Möbelbeschläge und Accessoires. Aluminium hat etwas Leichtes und Edles an sich - und ist dazu auch noch ausserordentlich strapazierfähig.

Les. Ljudje že tisočletja gradimo in oblikujemo z mehkobo iglavcev, trdoto bukve in hrasta ter prijetno barvo češnje. Les je vedno modna klasika, saj njegova energija pomirja in prostoru vdahne toplino in domačnost.

Drvo. Mi ljudi već tisućljećima gradimo i oblikujemo u mekoći drva igličastog drveća, čvrstoći bukve i hrasta te u ugodnoj boji trešnje. Drvo je uvijek modna klasika jer njegova energija smiruje i daje prostoru toplinu i osjećaj domaće atmosfere.

Plastika. Umetne mase omogočajo skoraj neomejeno poigravanje z oblikami in barvami. Uravnotežena raba drznejših dodatkov ustvarja občutja sodobnosti, mladosti in razposajenosti.

Plast. Umělé hmoty umožňují téměř neomezené možnosti při pohrávání s tvary a barvami. Vhodně vyvážené použití smělejších doplňků vytváří pocit současnosti, mládí a rozpustilosti.

Dodatki. Iznašli in oblikovali smo enostavne produkte, ki poskrbijo za drobne skrbi, kot so odlaganje plaščev, shranjevanje butelčnih vin, začimb in še česa. Priročni dodatki prihranijo dragocen čas in povečajo uporabnost bivanjskega prostora.

Аксессуары. Мы изобрели и придали форму простым предметам, которые удовлетворяют каждодневным целям, изящно решая проблему хранения пальто, винных бутылок, специй, и т.д. Эти удобные принадлежности помогут Вам экономить время и увеличить качество вашей полезной площади.
